

Sequential Sampling Heads

Accessories for Ambient Sampling

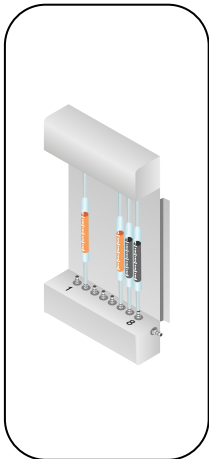

8 way Manifold for tubes or filters

Realized for outdoor use with inox roof, to be joint to the telescopic tripod.

Supplied with a 5 m long tube for connection to the sampler.

8 way Manifold	AA99-001-0220SP
Telescopic Stand	AB99-003-0001SP

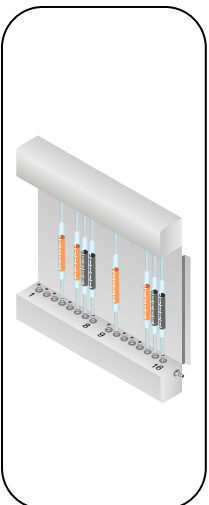

8 way Manifold with double lock for tubes

The double locking system (on both ends of the tube), avoids the alteration of the sample due to absorption/desorption before and after the sampling.

Indoor, use fixed to wall. Supplied with a 5 m long tube for connection to the sampler.

8 way Manifold for Tubes	AA99-001-0226SP
--------------------------	-----------------

16 way Manifold with double lock for tubes

The double locking system (on both ends of the tube), avoids the alteration of the sample for the first and later sampling diffusion.

Indoor, use fixed to wall. Supplied with a 5 m long cord for connection to the sampler.

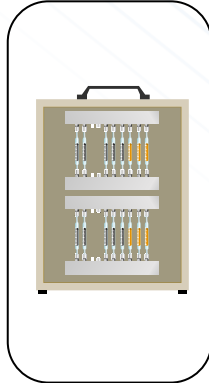

16 way Manifold for Tubes	AA99-001-0227SP
---------------------------	-----------------

Module for Tubes for Outdoor Operation

Provided with a double locking system, contained in a box for outdoor operation.

Supplied with a 5 m long tube for connection to the sampler.

8 way module (double locking)	AA99-001-0230SP
16 way module (double locking)	AA99-001-0231SP

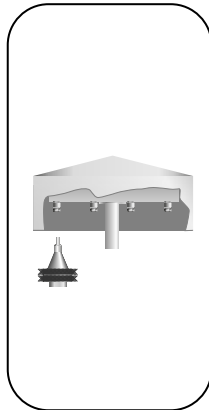

"Q8" 8 way Manifold for filterholders

Realized for outdoor use with inox roof, to be connected to the filterholders for membranes.

Supplied with a 5 m long tube for connection to the sampler.

8 way Manifold	AA99-001-0311SP
Reinforced telescopic tripod	AB99-007-0000SP

"Q12" 12 way Manifold for filterholders

Realized for outdoor use with inox roof, to be connected to the filterholders for membranes.

Supplied with a 5 m long tube for connection to the sampler.

12 way Manifold	AA99-001-0310SP
Reinforced telescopic tripod	AB99-007-0000SP
